

## Biofresh Protect Deep Cleansing Hand Gel – 50ml

Biofresh Protect Deep Cleansing Hand Gel is an alternative to the mass produced standard sanitisers that are purely functional, with a fresh fragrance and moisturising properties setting it apart from the rest.

A product that can moisturise hands yet hygienically protect them, leaving a confident and pleasing fresh natural fragrance – Biofresh Hand Gel is perfect for regular useage as the incessant use of alcohol-only sanitisers can cause dry irritable skin or worsen existing skin conditions.

Using ingredients such as Rose water, Silver water and with 62% alcohol, making Biofresh a triple action hand gel that is effective against most bacteria and viruses.

### Key Features:

- Rose Water – Moisturises & soothes irritated and sensitive skin
- Silver Water – Amazing antimicrobial ability limits oxygen to microorganisms
- 62% Alcohol – A strong antibacterial that kills viruses and bacteria
- Fresh natural fragrance
- Traditional handy portable tube
